

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

I am so tired of government departments adding taxes or raising the present tax on people like myself. A flat tax gives the impression that all the payers are equal. If that is so, then corporations and other businesses should be limited to the same number of call that I make ... which are very few. You, like all other areas of government are in the business of milking the citezens of this country like stupid cows. We are not stupid nor are we a herd of cows who will just go along with all of the rip-offs and acts of robbery you people just think up just you can have more money to waste. I know you will just go running to Bush and he'll give you what you want and run us all closer to bankrupting the country, but I just want you to know that I am against it and fed up with taxes. Why don't you people get an honest job?

Sincerely,

Patricia McMichael
